

Air-Water-Structural System

Transforming the Way You Test !

This system is at the heart of our automated line of precision laboratory test equipment. Perform air infiltration, water penetration and uniform pressure testing to current standards with ease and accuracy. Modular equipment and software design allows for cost-effective upgrades. Powerful software is ideal for both R & D and certification testing.

Key Features to consider:

- *Extremely user-friendly software*
- *Automated pressure control allows you to focus on the product under test*
- *High capacity 15 HP automated variable speed blower system - standard*
- *4" air lines throughout—standard*
- *Airflow automatically corrected to standard conditions Temperature and Barometric Pressure transducers correct airflow data to standard conditions*
- *Modular design with mobile console*
- *Emergency stop button*
- *Metric or English units selectable*

Other Products and Systems:

- *Test Wall System*
- *Spray Rack System (mobile / stackable)*
- *Digital Deflection Measurement System*
- *Water Recycling System*
- *Impact Cannon (large / small missile)*
- *Hurricane Cycling System*
- *Portable Test Kit (field, lab or line)*

Our Mission Statement

“To Deliver with Integrity -
High Quality, Cost Effective,
User-Friendly Automated Test
Equipment.”
